[Architectural Glass and Metal Technician Pre-Apprenticeship](#)

Job Description / Requirements:

#### **Architectural Glass and Metal Technician Pre-Apprenticeship**

The Pre-apprenticeship program is delivered to selected participants who will be trained to enter the construction industry in the trade of Architectural Glass and Metal Technician 424A (Glazier). FTI has designed the program to meet or exceed all MTCU requirements as outlined in the Pre-apprenticeship Guidelines. Participants of the program complete hands-on and classroom training, gain safety certifications required to work in the trade, and are provided tools and protective equipment. There is an opportunity during the final 8 weeks of the program for a paid job placement, where Pre-apprentices apply what they have learned and establish a relationship with an employer. At the end of the paid placement, some participants can be offered employment based on their level of success in the program and the needs of the industry at the time.

#### **Highlights of the Program**

Pre-apprentices are provided the required tools and safety equipment free of charge  
Participants build relationships with employers during field trips and job placements  
Participants will earn several certifications including the first level of apprenticeship training (Basic level)

**Qualifications awarded**

Level 1 Basic apprenticeship  
Workplace Hazardous Materials Information System  
Working at Heights  
Power Elevated Work Platforms  
Ladder and Scaffold Awareness  
Swing Stage  
Hoisting and Rigging  
First Aid/CPR  
Forklift

**Program participants are expected to**

Perform physical tasks, such as carrying glass, lifting ladders etc  
Participate in the entire program and show a commitment to their chosen trade  
Arrive at the job site on time, consistently  
Be teachable, willing learners  
Wear appropriate clothing  
We have one starting in June in Toronto
