Enjoys working at heights

Enjoys working with hands

Enjoys working outdoors

Entrance Requirements

- Grade 12 Diploma preferred (Grade 10 minimum)

Did You Know?

You've probably noticed that certain types of roof are more common in certain areas. Clay/ceramic roofs are common in deserts & tropical climates, shake roofs are prolific in the pacific northwest and New England, shingle roofs in the more wildly temperate parts of the world. This isn't just local color, it's science.

Key Skills & Attributes

- Working outdoors in all types of weather
- Working as a team in a fast paced environment
- Flexibility
- Ability to work for long periods of time bending or kneeling

Apprenticeship Program

3520 hours of on-the-job training, complimented by two 8-week in class technical training sessions.
